Concentration  
Of Troops Seen  
Adriatic

LONDON, April 5.—It is reliably reported here tonight that Britain and Poland have reached a final agreement on a mutual defensive military pact.

By RICHARD MASSOCK

Associated Press Foreign Staff

ROME, April 5.—Italian troop concentrations at Adriatic ports were interpreted in foreign circles today as a "warning" to Great Britain and France against carrying out their so-called "encirclement" plans, and to Yugoslavia and Greece against joining with France and Britain.

This view was strengthened by an article in the prominent Bologna newspaper *Il Resto Del Carlino* as political circles forecast greater freedom for Italian troop movements to Albania as a result of the expected strengthening of the Italian-Albanian defensive alliance.

Rumors persisted that Italian troops were ready to land in Albania, across the Adriatic from Italy.

*Il Resto Del Carlino* said that Great Britain and France were counting on the Roman abandonment of the Rome-Berlin axis when London and Paris have "encircled" Germany by creating a series of gas-tight pacts with Soviet Russia, Poland, Rumania, Yugoslavia, Greece and Turkey.

The newspaper advised "big and little illusionists" that for Italy, along with Germany, will reply it for its in any attempt at encirclement.

It said Great Britain and France "run the risk of being crushed."

JUDGES HOLD  
CAR DRIVERS  
RESPONSIBLE

Neil D. Maclean, K.C., Is  
Successful In Getting  
Decision Upheld

Amendments to Vehicles and Highway Traffic Act passed by the provincial legislature in 1934 did not give the monopoly of a main provincial highway to the motor traffic thereon, nor does it give a license to disregard all the statutory or common law duties as against a motor vehicle or its occupants whose driver has not observed this provision.

This was the opinion expressed by the majority judgment of the Alberta court of appeal in determining the appeal brought by Fred Kaup, St. Albert district farmer, against a decision of Mr. Justice A. F. Evans awarding \$3,000 to Miss Della Arcand for injuries received in an automobile accident on the Morinville highway.

MAJORITY JUDGMENT

The majority judgment was written by Mr. Justice Frank Ford and concurred in by Mr. Justice A. H. Clarke. Chief Justice Hon. Horace Maclellan, James A. Rose and R. D. Tighe, K.C., acted for the appellant, and Neil D. Maclean, K.C., for the respondent.

Chief Justice Harvey held there was no duty on a motorist travelling a main provincial highway.

ALBERTA WILL  
GET \$250,000  
FOR HIGHWAYS

Is Part Of Dominion Ap-  
propriation Of \$3,750,000  
For Projects

Supplementary Dominion appropriation estimates for \$3,750,000 for the highway development in various provinces this year will bring an estimated share of \$250,000 to Alberta, according to a telegram from Hon. T. A. Cregar, minister of mines and resources, stating that as soon as the estimates are passed by the Dominion house, he will advise us as to Alberta's share.

The minister declared that he had received information as to the exact amount of the Dominion appropriation for the highway development, and he would know whether he had to go to Ottawa to consult with the estimates.

For the last two years the Dominion has been required to put up \$1,000,000 being voted to surface thirty highways leading to the Black and Waterton national parks. These grants were made on a 50-50 basis with the province absorbing 50 per cent.

Chief Justice Harvey held there was no duty on a motorist travelling a main provincial highway.

In Divorce

Exclusive to Edmonton Bulletin

ALPHA CAMPBELL, 46, was killed  
at 4:15 this morning and her  
husband severely burned and cut  
about the hands and feet, when a  
can of gasoline which the woman  
believed to have been sent to  
clean clothes exploded, turning  
the house into a flaming heli-  
copter. Campbell was rushed to  
hospital at McEwen and the  
house and its contents were in-  
tally destroyed.

The husband's injuries were re-  
ceived when he made a gallant but  
unsuccessful attempt to get his wife  
from the burning home. Outside  
when the explosion occurred he  
made several desperate rushes  
toward the flames, only to be  
driven back. He was cut when he  
made another attempt to enter the  
house by the window.

Details of the tragedy are scarce,  
but Mr. Campbell is believed to  
have had the gasoline container on  
the stove when the blast occurred.  
Her husband, only 40, was in critical  
condition, was rescued by neighbors  
who heard the explosion and who  
wrapped him in blankets after giving  
him rough first aid treatment.  
It is not yet known if he will re-  
cover.

The Campbell family were farming  
out the town. Two young children  
of the family are attending school  
at Falher and are boarding at the  
convict of St. Anne. They were not  
at home when the explosion occurred.

Wheat Acreage  
Bonus Measure  
Is Introduced

OTTAWA, April 5.—Hon. J. G.  
Gardner, agriculture minister, to-  
day took the first step to securing  
parliamentary approval for the  
government's new wheat policy  
which includes an acreage bonus up  
to \$20 an acre, a one per cent de-  
duction from western grain market-  
ing, assistance to co-operative mar-  
keting enterprises and a guaranteed  
initial price of 60 cents for wheat.

He moved for adoption of a resolu-  
tion preliminary to the introduction  
of a bill to provide for the de-  
duction and the acreage bonus.

He said the government was anxious  
to secure the support of the farmers  
in the west, and that the new policy  
was a necessary step in the direction  
of a more equitable and efficient  
wheat marketing system.

The bill will provide for a de-  
duction of one per cent from the  
market price of wheat, and for a  
bonus of up to \$20 an acre for  
wheat raised on land which has  
been in wheat production for  
three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

The bill will also provide for a  
guaranteed initial price of 60 cents  
for wheat, and for a bonus of up  
to \$20 an acre for wheat raised  
on land which has been in wheat  
production for three years or more.

First Lord Absolved In Blame For Order  
to "Man the Guns"—Newspapers Asked  
To Suppress Statement

LONDON, April 5.—Prime Minister Chamberlain told the House of Commons today that Earl Stanhope's "man the guns" speech was "unprecedented". Mr. Chamberlain said it was not true that Lord Stanhope, First Lord of the Admiralty, had asked the press to give special prominence to his statement that the anti-aircraft guns of the royal navy were ordered manned.

The prime minister said he had acted to "ensure the public understood the situation". Mr. Chamberlain said that Earl Stanhope's speech because it gave an incorrect impression.

## SANITATION PROBLEM IN TURNER VALE

TURNER VALEY, ALB., April 8.—Turner Valley residents are confronted with a sanitation and waste problem.

For many years farms from waste gas has illuminated the valley and other farms have disposed of garbage and waste water from houses. With the extension of the sewer through a conservation board order residents believe that due to the nature of the soil water in the kitchen will remain on the surface and create a breeding place for flies and a nuisance to health.

Steps are being taken to call attention of health authorities to the situation. Electric lights are being considered to replace the old, flare but funds for this purpose are not yet available.

## South Alberta Under Blanket Of Wet Snow

LETHBRIDGE, April 8.—For the second time the wet snow blanket in this valley has been renewed. In the Crown's West Pass a furious blizzard descended with the snowfall.

Two and a half inches of snow fell in the storm here yesterday morning. About an inch had fallen in the morning and was melting rapidly. Colder temperatures accompanied the snow.

Farmers have been hauled in their spring work by the fresh precipitation but vehicles from Calgary, which had become dry in many areas.

## Oklahoma Oil Firm Interested In Turner Valley

CALGARY, April 8.—J. S. McCabe, member of the geological staff of the Superior Oil and Refining Company, Limited, of Tulsa, Oklahoma, a major United States oil company, is interested in the Turner Valley, the Calgary Herald said today.

Interest shown by Mr. McCabe's company in Alberta oil possibilities was announced at a meeting of the oil industry in Calgary, where Standard Oil Company of California and a geological survey by the U.S. Geological Survey of the Turner Valley, the Calgary Herald said today.

## Gov't Guarantee

OTTAWA, April 8.—Government guarantee of a Canadian National Railway loan of \$25,000,000 is provided for in a resolution of which Hon. Charles Dunning, minister of finance, gives notice in today's House votes and proceedings.

## APPOINTMENT OF CHIEF JUSTICE TO BE EXTENDED

By THOMAS WAYLING  
Exclusive to Edmonton Bulletin  
OTTAWA, April 8.—Sir Lyman Duff, chief justice of the supreme court of Canada, whose retirement is due next year, will be continued in office for two years longer.

The minister of justice will introduce a bill extending Sir Lyman's appointment for two years beyond the statutory age of 75. The supreme court justices are to be appointed for life and there are a number of important cases which decision has not yet been given and in which the present chief justice participated in the hearing.

BOTH NEGLECTED  
The majority judgment found that both car owners had been negligent and that the collision had been caused by that negligence and it is not possible to establish in different degrees of fault, the judgment ordered that their liability be equally apportioned.

## Levy Upon Public

OTTAWA, April 8.—The government wants to levy upon a public utility for its failure to do so but the result is a levy upon the public which amounts to the raising of a government tax.

## General In Refugee

LONDON, April 8.—Generalissimo Franco, Spain's Republic, has been ordered to surrender Madrid to the Nationalists, according to a report from the city. The report says that the Nationalists have nearly 60,000 Spanish Republic refugees.

## FINANCING BY SILVER

He asked Mr. Towers when the inflation point would be reached and the reply was that circumstances would dictate the inflation point. Mr. McCreedy said that the silver money would save the government the interest they would have to pay if it were done by a bond issue but Mr. Towers declared the interest was paid to the people and that silver currency was not legal tender beyond 10 and could not be used for the balance of the reserve.

## Resignation Of New Protested By War Veterans

CALGARY, April 8.—A Calgary branch of the Amputees' Association, based in the city, through its executive committee, passed a resolution last night strongly protesting against the forced resignation of Robert Rea.

## Warship Launched

MONTREAL, April 8.—The torpedo boat Kshatri, 1,600 tons, was launched Tuesday.

## GOLD CLAUSES ACT LIKELY TO BE REPEALED

By THOMAS WAYLING  
Exclusive to Edmonton Bulletin  
OTTAWA, April 8.—The tightening up of legislation dealing with the payment of obligations in gold or gold coin is expected to be repealed by the Minister of Finance when he brings in to repeal the Gold Clauses Act.

In 1937, the Gold Clauses Act was passed providing that obligations payable in gold or gold coin could be discharged by payment in legal tender or currency and not in gold.

With gold revalued from \$20.67 to \$35 the payment of such obligations in gold coin would be a hardship, so the legislation was passed to change the situation.

A test case was taken to the Privy Council in the matter of some bonds of a New Brunswick railway which the C.P.R. had taken over. These bonds were payable in gold and the bondholder demanded the gold despite the legislation.

Mr. Dunning will now bring in a new bill closing loopholes in the old law which allows the obligation to be paid in actual gold.

## Continued From Page 1 Britain Tries

planned toward Jugoslavia and Greece and Turkey, in an attempt to bring about a general peace in the Balkans.

Arthur Greenwood, setting leader of the opposition, who asked the prime minister for the statement on Lord Stanhope's speech, inquired:

"If the first lord was not precluded, does the prime minister regard the first lord as a person to hold an important office?"

"Is not the prime minister making rather light of a serious business? Will he give an assurance that such indiscreet, irresponsible and unpatriotic statements shall not be repeated in the future by responsible officers of the crown?"

Mr. Chamberlain replied: "No. My noble friend has expressed regret that his words—which perhaps were not very happily chosen—should have given rise to so much comment and so much unnecessary alarm. I do not think that affects the efficiency of my noble friend, with whom I am perfectly satisfied."

## Lord Stanhope Speaks

While Mr. Chamberlain spoke in the commons, Lord Stanhope rose to the House of Lords and explained that the guests on the aircraft carrier Royal last night had been asked to expect all sorts of mobile friend, with whom I am perfectly satisfied."

"Therefore, I ventured to explain that the reason why there was not full attendance was because of the nature of the service and the fact that the guests on the aircraft carrier Royal last night had been asked to expect all sorts of mobile friend, with whom I am perfectly satisfied."

## EXPRESSIONS SECRET

Mr. Chamberlain replied: "No. My noble friend has expressed regret that his words—which perhaps were not very happily chosen—should have given rise to so much comment and so much unnecessary alarm. I do not think that affects the efficiency of my noble friend, with whom I am perfectly satisfied."

## Seventy Crisp \$1,000 Bills Seized by Police Serve as Accused's Bail

MONTREAL, April 8.—Seventy crisp \$1,000 bills, seized by police in the house of Francesco Giardina, were turned over by police to serve as bail for the woman's bail pending her trial on charges of stealing \$100,000.

Giardina did not plead but through her attorney, demanded preliminary inquiry, which was fixed for April 12.

Japan—1,200,000 or more under arms pending the conflict with China and guarding the Siberian border, plus 4,700,000 reserves.

The United States—1,000,000 active army and 2,000,000 reserves. At sea, Great Britain and France have warship tonnage of 2,000,000 compared with 1,100,000 for Germany and Italy.

Latest revised comparative figures credit Japan with \$60,000 in warship tonnage. The U.S.'s navy is 1,400,000.

## Continued From Page 1 Concentration

and all the worse for the little powers who dare to kindle the active in the game of the big powers.

Diplomatic interest focused on the situation between Italy and Albania, officially described as intended to strengthen their military alliance.

The treaty of Tirana, signed in 1927 provided for dispatch of Italian troops to Albania if the latter requested such aid against a war danger.

Some foreign observers considered it likely that the treaty would be broadened to permit Italian troops to help King Zog crush any revolt in his little domain across the Adriatic from Italy.

It was reported in some circles that Zog had asked for Italian troops to put down an uprising but this lacked official confirmation.

## Ban Removed

CALGARY, April 8.—A ban against visitors to the Junior Red Cross hospital applied during the outbreak of influenza, has been removed. Lieut.-Col. D. H. Tomlinson, Alberta commissioner of the Canadian Red Cross Society, announced today.

## Wetaskiwin Woman Passes Tuesday: Former Citizen

WETASKIWIN, April 8.—Mrs. Myrtle Jensen, wife of Dr. W. E. Jensen, died Tuesday afternoon, former Edmonton resident, who was employed with the land titles office there after coming to Alberta in 1925. She was 68 years old.

Surviving are her husband, a daughter, Mrs. M. Jensen, and two sons in England. Another sister, Mrs. C. Harvey, who resided in England, is also surviving.

Funeral services will be conducted from the funeral chapel, Friday afternoon at 2 p.m. Rev. W. M. Nainby will officiate. Interment will be made in the Wetaskiwin cemetery.

## Continued From Page 1 Hayes' Funeral

Rev. C. Steiner was in charge of the service.

Palmer was Glen L. MacLachlan, Fred M. Baker, Dr. J. L. McPherson, Alfred J. Hooke, S. A. Jorg, and Herbert E. Hays. All members of the legislature and the first four members of the Social Credit party were present.

Mr. Hayes had served since its inception in 1927.

Mr. Hayes died suddenly at his home in Stoney Plain Sunday. He was 59 years of age.

In his service, Mr. Steiner paid tribute to the kindness and friendliness of Mr. Hayes and to his devotion to public service.

Members of the legislature gathered on the front steps of the legislative buildings at 1:45 p.m. and drove from there to the chapel, where they occupied specially reserved seats.

PROCESSION  
At the conclusion of the service the funeral procession formed up and leaving the chapel moved eastward on Jasper avenue to 107 street. It proceeded south on 107 street to the legislative buildings. Coming to a halt in front of the hall, all of the procession moved to the front of the hall, where they occupied specially reserved seats.

## Half-Mill Slash In Toronto Taxes

TORONTO, April 8.—Toronto citizens will be spared today an additional half-mill reduction in the city tax which represents the lowest rate in this city since 1927.

Mayor Ralph Day announced a 1939 reduction yesterday from the existing rate of 35.25 mills to 34.75 mills. He stressed because of the new gasoline tax revenue to be collected from the Ontario government.

## CANADIAN HEAT PROBLEM NOW BEFORE HOUSE

Hon. J. G. Gardiner To Introduce First Of Series Of Bills

OTTAWA, April 5.—From the heated condition of Europe and Canada's position in the event of war, the House of Commons turns today to the problem of wheat in Canada's own troubles—where the problem of wheat is acute.

Hon. J. G. Gardiner will introduce the first of a series of bills embodying the government's new wheat policy. The measure will move for the introduction of a bill to provide for an acreage bonus to farmers in consideration of emergency and for a percentage deduction from the grain marketed in the spring wheat area, the three prairie provinces.

**DISCUSSION ENDS**  
International affairs occupied the House of Commons for almost four days and the discussion of the subject ended last night with the passage of an estimate for the department of external affairs, over which Prime Minister Mackenzie King presides.

The position of Canadian Ministers to Japan will remain vacant for the present, Mr. King told the House in reply to a question. The Canadian legation in Tokyo is headed by a chargé d'affaires since the resignation of Hon. R. B. Bennett and the Prime Minister indicated the government intended to leave matters in the hands of the present minister until a minister would be appointed later on.

**USEFUL SERVICE**  
Hon. R. J. Manion suggested Canada's permanent office at the League of Nations served a special purpose and might be closed but the Conservative leader did not press his point. The Prime Minister said the cost of the office was only \$200 a year and it performed a useful service in keeping the government advised on conditions in Europe.

The Prime Minister's role in international affairs was highlighted by J. F. Pouliot (Lib., Toronto), who recalled Mr. King's visit to Chancellor Hitler of Germany in 1937.

**VERY GOOD EFFECT**  
The visit had of course a very good effect for two years, said Mr. Pouliot. "During that time nothing extraordinary was done," he said, "but Hitler and he tried to get all the credit he could."

He also said: "It must be remembered that on Wednesday last an important announcement was made by Mr. D. L. MacNeil, Minister of Finance, and on Thursday the Prime Minister of Canada spoke on the international situation. Perhaps those speeches are reasons why Hitler was so impressed by his speech on Sunday at Wilhelmsstrasse, that he was in other proportions."

**BILL TALKED OUT**  
A plea for revision of Canada's Militia Act of 1904 was made by Grant MacNeil (C.C.F., Vancouver North) but his bill to amend the act was "talked out" by private members' hour. T. L. Church (Cons., Brandon) introduced a bill to amend the Militia Act.

Mr. MacNeil's amending bill would provide that command of Canada's armed forces be exercised by the Governor-General on the advice of the Canadian Council of Ministers of the Government or by the King or the Governor-General as his representative.

**RESTRICTED POWER**  
It would restrict the power of the Governor-General to order mobilization of the male population of Canada for the exercise of the act only on the advice of the Privy Council for Canada and after parliament had passed an authorizing act.

The changes, he said, would assure parliamentary control over the armed forces of the country and would bring the Militia act more in harmony with the constitution of Canada as an autonomous nation.

**CONFERENCE URGED**  
A conference of the "have" and "have-nots" is being brought about a more equitable distribution of the world's land and material resources was urged by P. J. Rowe (C.C.F., Vancouver).

Angus Macdonald (C.C.F., Vancouver East) urged an embargo on the export of war materials to aggressor nations, a declaration by Canada of adherence to the League of Nations and collective security, passage of legislation to assert Canada's right to remain neutral in any war and the calling of a conference of the League of Nations assembly to discuss the present international situation.

**Trade Mission To Rumania Soon**  
LONDON, April 5.—Officially, the president of the board of trade, announced in the House of Commons Tuesday, Sir Frederick Lathlow, economic adviser to the British government, will lead a British trade mission to Rumania.

Mr. Lathlow said the mission would leave in about two weeks. He said the mission was organized for planning a mission which had no power to negotiate a new trade agreement, the minister said. "We believe this mission will serve a very useful purpose, but it is true that no new agreement will be negotiated."

**Douglas Confirmed**  
WASHINGTON, April 5.—The Senate confirmed today the nomination of Douglas as an associate justice of the United States Supreme Court. He succeeded Louis Brandeis, who recently retired.

## Reflecting A Drive For Highway Safety

Tested on a steep incline near Hartford, Conn., this new safety device enables motorists ascending a hill to get what's coming up on the other side. Built of seventeen vertical bars of glass laid in parallel over the face of a mirror, it has a visibility ranging up to about 3,000 feet.

## NEW OUTBREAK OF BOMBINGS DURING NIGHT

Birmingham, Liverpool, Coventry Are Rocked At Intervals

LONDON, April 5.—Six bomb explosions rocked Birmingham, Liverpool and Coventry at intervals during the night and early today in what police described as a new outbreak of Irish republican army activity.

No persons were hurt but considerable damage was done. The entire police force of Birmingham was mobilized to hunt bombs in all quarters of the city.

**LITTLE DAMAGE**  
Just before daylight in Liverpool a bomb exploded on the road beside the Lancashire weavers' cricket field, little damage was done. An hour later another explosion took place in the city near the tramway lines.

At about 5 a.m. in Coventry a bomb attached to a tramway point at an important intersection exploded. A nearby hotel was damaged.

Instructions to carry out military orders already given them within the next 10 days were broadcast to supposed units of the outlawed Irish Republican army in Canada and the United States last night over a secret radio transmitter.

The speaker, broadcasting over a 21-mile wavelength, referred to the Irish Republican army as the "British army."

Similar groups in Canada and the United States are reported to be carrying out orders already given them.

OTTAWA, April 5.—Commissioner S. T. Wong, of the Ontario Mounted Police said he knew nothing of a reported secret radio broadcast in Kingston to agents of the underground Irish Republican army regarding "operations ordered in the future."

He added that he knew of no I.R.A. organizations in Canada, and that he had no information in royalties to Henry W. Armstrong, co-author of "Sweet Adeline."

**IL DUCE FAVORS OLDER SENATORS**  
NEW YORK, April 5.—"Sweet Adeline" is still being written in royalties to Henry W. Armstrong, co-author of "Sweet Adeline."

He said his way of a \$2 fine yesterday in traffic court for the violation of the song verse was by a McKinley.

When Magistrate McKinnley learned the defendant was the composer of "Sweet Adeline," he observed he was familiar with the lyrics of the song, but had never heard the verse.

"Oh, yes," Armstrong responded. "It is a verse," he asked.

**SUSPENSE ENDED**  
—Then it and I'll suspend your sentence," the court ordered. Armstrong obliged with these words: "Yes, your honor."

There's a picture that in fancy art appearing brings back the time, when you were near.

**MENUHIN'S FIDDLE IS BEYOND PRICE**  
WINDSOR, Ont., April 5.—Yehudi Menuhin, the famous violinist, has a Stradivarius fiddle, which has no idea how much it is worth. "How much would you sell it for?" he was asked when he recently visited Windsor.

"Well I have it insured for \$100,000," he said. "I don't mean to sell it," Menuhin replied. "If you would like to buy it, I would be glad to sell it for that figure."

Menuhin has just completed plans for a world tour beginning April 10, visiting Canada, the United States, Germany, "I may not be true to the political frontier of the United States," he said. "But it is the cultural frontier of the world as far as artists are concerned."

**Scotland Yard Chief Appointed For Royal Tour**  
LONDON, April 5.—Chief Constable of Scotland, who directs Scotland Yard's campaign against gangs and Irish Republican army terrorists, Tuesday was appointed to accompany the King and Queen to Canada.

**Farmers Begin Work On Land**  
REKINIA, April 5.—A few farmers have begun work on the land at South Current, it was reported Tuesday, and Moose Jaw shows a marked increase in the demand for farm labor, according to the weekly letter of the Bureau of Labor and Public Welfare.

The Regina office showed some increase in demand for farm labor and weather continuing warm and drying.

**Tax Immunity Gone**  
WASHINGTON, April 5.—The United States Senate approved today a bill to wipe out tax immunity enjoyed by state and federal job-holders, including judges and members of Congress.

**Hospital Poll Tax**  
BLACK DIAMOND, Alta., April 5.—A five-cent poll tax for hospitalizing residents has been decreed by the district council here for hospitalization and relief.

**Few Alarms**  
CORONATION, Alta., April 5.—The coronation of King George VI. in Coronation in three years. It was only a minor fire in the coronation of King George VI. in Coronation in three years.

The first iron to be made in America was produced near Lynn, Mass., in 1848.

WHEN THE TIME COMES to retire, will you have an income to replace your earnings, or will you be dependent on relatives? Eighty-four percent of men who reach age 65 are dependent on others. You need not be one of them IF YOU follow the Great-West Life insurance during your productive years.

You will find it profitable to consult the GREAT-WEST Life man. He can show you how to guarantee a monthly income for yourself on retirement. Behind him stand the resources, experience and facilities of one of the oldest and strongest life insurance companies.

## Canadian National Sees \$17,758,278 Increase In Revenue For Year 1939

OTTAWA, April 5.—The Canadian National Railways budget, tabled in the House of Commons today, shows an increase of \$17,758,278 compared with \$18,252,241 in 1938 and \$19,308,348 in 1937.

The publicly-owned railways estimate for operating expenses in 1939 was \$120,000,000, an increase of \$10,000,000 compared with \$110,000,000 in 1938 and \$120,000,000 in 1937.

The net operating revenue estimate for 1939 was \$137,758,278, an increase of \$17,758,278 compared with \$120,000,000 in 1938 and \$137,758,278 in 1937.

**HITLER'S PAPER BLAMES U.S. IN RUIN OF TRADE**  
BERLIN, April 5.—Chancellor Hitler's newspaper Voelkischer Beobachter yesterday charged that Washington's desire "to ruin Germany's business in South America" was behind "awkward falsifications" published by Argentine newspapers concerning German designs on Patagonia and the bombing of the German embassy in Chile.

"The deeper background certainly is the wish of Washington to ruin Germany's business in South America by every means possible," the paper said.

"By every means—even with blood," the paper said.

"The attack on the German embassy in Chile also is the fruit of

#### Dominion Money for Highways

Parliament is voting \$3,750,000 this year to assist the provinces in building tourist highways. The plan is that the provinces will match this money dollar for dollar, thus creating a fund of \$7,500,000 for the purpose. Last year the Dominion provided \$1,750,000 under this heading. The results were so satisfactory that the amount is more than doubled in the present estimates.

Alberta stands in a different position than any of the other provinces. The two great mountain parks are within the area of this province. To accommodate tourists there the Dominion has provided \$1,750,000, aside altogether from this appropriation for tourist highways. The completion of the Jasper-Banff highway will require \$335,000, and to finish the Big Bend highway \$805,000 is to be voted—Dominion money exclusively.

If, in addition, Alberta is given a full share of the tourist highway money, there likely will be objections from the other provinces that it is getting too much Dominion road money. The objection would not be altogether just, but justice is not the first consideration when provinces clamor for Dominion aid. That is the point cannot prevent Alberta asking, and taking all it can get.

#### Street Fatalities

Up to and including Sunday last, four persons were killed on the streets of Edmonton in motor car mishaps since the beginning of the year. During the whole of last year only three deaths resulted from traffic accidents in the city. The contrast is startling. The more so because the four recent fatalities were due to four separate occurrences, in widely distant parts of the city and under widely differing conditions of lighting and road surface.

It would be appalling should this fatality rate continue. And it will not do to assume that it will not continue just because winter is past and summer is coming. For while driving conditions are worse in winter, there are more cars and more pedestrians on the streets in summer.

Though the ratio varies, a sharply increased number of fatal accidents suggests an increase in the total number of accidents; therefore the need of stricter enforcement of safety regulations. This was no doubt in the minds of members of the city council when they decided, tentatively, Monday evening, to provide the police department with three radio-equipped cars and to add three members to the force. The tentative decision should be confirmed, the cars secured and the extra men hired. Four traffic deaths in three months call for action to make the streets safe.

#### To Whom It May Concern

A French-Canadian the other day told parliament, and the world at large, that the British Empire is not going to be pulled to pieces, and that Canada will be in the fight if Great Britain is attacked. Hon. Ernest Lapointe was even more emphatic than the Prime Minister in declaring Canada could not remain neutral in a war in which the liberty and security of another part of the Commonwealth was threatened.

It was important that some one qualified to speak for French-Canadians should say these things at this juncture. Not because people in the other provinces have accepted Mayor Houde of Montreal or Premier Duplessis as voicing the views of the majority in Quebec, but because this misconception might be believed elsewhere. Mr. Lapointe has done a service to Canada, to the Empire, and to the cause of world peace, by dispelling any hopes or fears which were based on the suggestion that French-Canadians were neutral on the subject of Empire solidarity.

English-speaking Canadians may well read his exposition of what neutrality would mean in actual practice. It will clarify their own thinking on the subject, and also show them that Quebec would be the most immediate sufferer if neutrality were attempted, since its ports would be blocked and its commerce destroyed.

It is timely to recall that French-Canadians once saved Canada for Britain. And the declaration of one of their most distinguished sons that "When the last shot is fired by the British connection it will be fired by a French-Canadian."

#### The Personal Covenant Ruled Out

One of the new enactments of the Alberta legislature is an amendment of the Judicature Act which cuts the personal covenant out of mortgages and agreements for the sale of real property. This applies alike to mortgages and agreements now in existence, and those made hereafter.

The effect is that if land is mortgaged or sold under agreement, the property itself is the only security on which the creditor can realize. He may foreclose and compel sale of the property, or obtain possession of it. But he has no further claim against the debtor.

This reform has been plainly overdue for a quarter of a century—ever since the real estate boom collapsed in pre-war times and left thousands of people pledged to pay for town lots and farms they had lost through inability to keep up their payments. Had the law been changed before the boom occurred the prices of lots and farm lands would never have soared to the dizzy heights they did, and there would not have been the sorry and prolonged period of reckoning.

Hereafter the person who sells property on time, or who lends money on property, will have to take a candid look at its value, for it is all that he can hope to recover if the deal breaks down. Overcharging for property, or over-lending on property, on the ground that the buyer or mortgagor has other assets which can be grabbed for satisfaction of the claim, will no longer be profitable or safe.

The seller will have to set such a value that he will be willing to take the property for what is still due him on the purchase price. The lender will have to restrict his loan to the amount he would be willing to pay for the property. That is not to prevent Alberta asking, and taking all it can get.

#### Editorial Notes

Several members of the Saskatchewan legislature are turning backs received in the "paper fight" which ended the session. Evidently the Solons there some of their weightiest speeches at each other.

The victorious Nationalists shot the four members of the Republican military police at Valencia and 20 of his assistants. Wasn't something said about Franco having promised to forego the pleasure of killing his former enemies?

The Dominion Government proposes, with the consent of the provinces, to distribute some of the surplus butter free to families who are on relief or close to the border line. Further evidence, it is to be supposed, of the Government's callous indifference to people in distress.

#### Fifty Years Ago

From the Files of The Edmonton Bulletin

Hon. J. H. Pope, minister of railways, died. He had been ill two years. Haggart, postmaster-general, will likely succeed him in the railway department.

The eldest son of the late John Bright will contest his father's seat for the House of Commons, where the great orator was supreme for many years.

A mounted police expedition has been started by the Quebec government after Morrison, the Magentic county murderer, who has been sought for a year.

#### Forty Years Ago

The Cuban army has been disbanded. A London landlady objected to serving Lady Harberton with refreshments while the latter was wearing bloomers.

Japan is jealous of the demands of Italy upon China and has made a request for a new settlement.

#### Thirty Years Ago

London: Lord Bessborough has provoked wide interest by taking a bold stand that the British navy should not be in the sea alone but should also include a gigantic fleet of ships. The Strathcona line of trade urged the city council to proceed with the construction of a high level bridge and a union hospital.

Barristers in the province must take out licenses by July 1.

#### Twenty Years Ago

Ottawa: Second reading was given to the bill to create a federal department of public health. Washington: Secretary Newton D. Baker quitted President Wilson as favoring the immediate granting of complete independence to the Philippines.

London: Trevelyan has ordered the Russian fleet to put to sea before the Allies, threatening to have the crews shot if they refuse.

#### Ten Years Ago

Sydney: One clue came out of the wild Australian bush to guide searchers for the airplane Southern Cross, vanished since March 31, with Capt. Kingsford-Smith and three companions on first lap of a flight to England.

Toronto: With the entire province occupied in counting the damages from one of the worst gales in history, estimates are that property losses will run into millions of dollars.

C. J. Yeath, president of Canadian Utilities, announced his resignation as mayor of the city council to buy the city's light and power system and street railway.

#### Current Comment

##### Italy's Claims

It seems curious that if there is to be any "general settlement" of the claims of Italy with Italy's ambitions no longer with Germany's. Any attempt by Signor Mussolini to claim France into one-sided concessions might ruin the very basis of such a settlement. It is obvious that no French government could surrender lands which are a part of France itself. Indeed, M. Daladier has declared that any sort of territorial concession whatever, and limitation of armaments as was suggested in the Prime Minister's speech, would be the threat in the Mediterranean exists, prospects of better times in Europe must remain very uncertain—Glasgow Herald.

##### Allens on Relief

Recently a report was placed before the Edmonton City Council showing that during the past eight years 264 unutilized aliens have received relief to the amount of \$516,000. It started the Edmonton council as it startled the residents of that city.

The immediate function of the council was to take steps to have the whole lot deported if that should be possible, but second thought would lead to believe that wholesale deportation would be unwise and in some instances perhaps unfair. And so, while deportation proceedings have been started for some of the aliens, the rest will be left to the discretion of the Immigration Department.

There are other factors, too. It may be that some of these aliens have made real efforts to obtain work, have been incapable of work through illness or accident, or have been unemployed for some time when opportunity afforded. In such cases their status as recipients of relief would be the same as others, excepting for the fact that they have not sought or obtained Canadian naturalization.

In circumstances, it is rather astonishing that they have not been naturalized, and the fact that they have not done so while receiving relief from this country suggests that they must have active reasons for not doing so. If Edmonton is going to acquire their status with a view to deportation, certainly a large part of them should be given the opportunity to seek naturalization.

##### Germany's Foreign Trade

The sharp reversal in trend in the foreign trade of Germany and the unfavorable balance of import and export which resulted in 1938 is an important factor in the present international situation and a matter of concern to the Nazi authorities. Between 1934 and 1937 Germany succeeded in transforming an import surplus of \$84 million Reichsmarks to an export surplus of \$443 million. In 1938, the excess of imports over exports for "Greater Germany" was no less than \$32 million. This represents a change of 876 million Reichsmarks from the results of the previous year. Such a development, however, the need for the country for raw materials for her industrial and commercial programs and for foodstuffs for her people, is a matter of prime importance.

In his annual speech last January the president of the Royal Bank of Canada stated: "Contrary to the impression current in many quarters, Germany has made considerable progress in the rehabilitation of her foreign trade. Official figures indicate that in no year under the present regime have exports exceeded one-half of the values of the year 1930, and data available indicate that in 1938 total exports were actually less than in 1932 and 1933, the nadir of the world depression." The decline in German exports has become acute since the September crisis and is, in part, attributable to the economic policy of many countries to close their markets to German goods.

From a peak of 13,685 million Reichsmarks achieved in 1937, total exports for 1938 declined to 4,167 million in 1934. With the adoption of rigorous methods for the improvement of the situation, the conclusion of trade agreements, the introduction of barter, and the use of "marks" marks, some results were without doubt attained, but in 1937 the total value of German exports was still comparatively low at 5,911 million Reichsmarks. In 1938, this total declined to 5,237 million Reichsmarks.

The Austrian Anschluss has been of no advantage to Germany from the standpoint of foreign trade, since many foodstuffs and other raw materials had to be imported by Austria and an excess of imports over exports was the result. Excluding trade between Germany and Austria, this excess rose to a high of 241 million Reichsmarks in 1938, with the decline of the old Reich of 192 million, the total excess of imports over exports for 1938 was 423 million Reichsmarks.

Official reports indicate that industrial activity has been general with full employment for all persons available. Indeed negotiations for the repatriation of German nationals living abroad have been reported in many countries. Even this situation, however, is not without its drawbacks. Interpretation usually accepted, but must be attributed to the enormous expenditure of Government funds on armaments and on protective enterprises. Expenditures for government requirements and related purposes amounting to 26,800 million Reichsmarks in 1938, or nearly 50 per cent of the national income which was placed at 54,000 million Reichsmarks. "During the last few years this proportion has steadily grown." Continuation of the present spending must ultimately lead to serious inflation and a lowering of the standard of living in spite of the control which the Government exercises over wages and prices.

The recent accession of the former Czechoslovakian Republic as a member of the League of Nations promises to be of little assistance to the Reich so far as the foreign trade situation is concerned.

#### The Passing Show

By S. S. COWPER

If Einstein visits the Edmonton airport on his travels, be careful how you explain things to him. He thinks in a different atmosphere of thought than most of us. He visited Newark, N.J., the other day, and one of the city's publicity men—Harry Austin—highly impressed him into visiting the city on his return.

Einstein's great interest in the airway LITTLE ROY control system and radio equipment, with barometric pressure altimeter. "I want to see that altimeter," he said.

This altimeter operates on an airplane something after the fashion of a sounding bell mechanism on a ship. Only instead of timing the sound echo from the ocean bed, an electric impulse is sent out, and the time of transit to the ground and back shows on a dial in terms of feet. "What a time it takes to explain the principle," Einstein as Austin tried to explain the principle.

"Well, the time it takes for the impulse to travel is known and that gives the distance"—started.

"No, no. The sun goes round the earth," corrected Einstein, adding "That would be like X."

"There's a pamphlet here that explains all about it," suggested Austin.

"No pamphlet, please. I want you to explain."

Taking a deep breath Austin plunged once more into the field of radio theory which he interrupted by the smiling physicist, who said, "Let me explain, please. The sun going round the earth is represented by the time it takes the airplane to travel at 190 miles an hour. That would be C. That would mean a particle of a second."

"Nonsense, you consider C in relation to X," Einstein said. "I don't know what X is." "Say, professor," begged the publicity agent, "you'll just have to take one of these pamphlets."

"No," said Dr. Einstein, "I don't want to see that altimeter," he said. "I want to see that altimeter," he said. "I want to see that altimeter," he said.

The fisheries of the Kamchatka Peninsula, which is the focus of the Japanese-Japan war, are threatening to be the cause of another war before many weeks are over. In the Portsmouth peace terms, Japan was given the right to lease till 1953 a large number of the Kamchatka fishing stations. Since

WAR LOOMS, then the lease has been renewed for another year, and Japan has been allowed to build a large fishing fleet on the peninsula.

latterly with acrimonious discussion and threats. From Japan has been sent out a large expeditionary force and the Kamchatka fishing grounds are now under Japanese control.

This year, Russia has auctioned off to Russia 200 of the fishing stations that the Japanese had come to regard as permanently allocated to them. Japanese fishing boats proceeded to the Kamchatka fishing grounds in 1938, and Japan is preparing to give her 20,000 fishermen the protection of her warships.

Japan has known full well that when war comes with either Japan or Germany it will mean war with both—hence her dual policy system, with her 3,500,000 men divided into armies in Europe and in Asia. Japan has been sending armies into Manchuria in the last few weeks.

With the nations divided into two camps, it is anywhere today may possibly bring about a world war.

Maybe one ever tried to sell you the High Level bridge, but be on your guard. A negro person in New York made payments of \$500 to the two men who were building the bridge. They DIPPED the Seventh Day Adventist PARSON church in Harlem for \$50,000 on the condition that they give him two keys—a large one and a small one. When he would be given possession, and the Seventh Day Adventists told to vacate, when he had paid \$10,000, he would not be allowed to enter the church, when it would be convenient for them to move, that he found he had been duped. He'd be hearing on the "double-crossing of riches."

"We've just bought an old country house and I'm looking for some things to store in the attic."

#### What Is Your Opinion?

This is your column in which to express your views and comments on the news and current events of the day. We want to hear your views, and we will publish them.

Writers are asked to restrict their comments strictly to the subject under discussion. Let us hear your letter and your opinion on outstanding events of the day. We want to hear your views. —EDITOR.

#### Raise Gas Tax

Editor, Bulletin: It is the opinion of others and myself that the cost of licenses for cars, trucks, etc., is too high. Would it not be better and more convenient for all concerned, including those who are trying to make a living by truck and heavy, and the tax on gas, to raise the price of licenses to \$2, regardless of weight?

Today it is near impossible for truck and heavy trucks to take out a license due to the very high cost of same. From information gleaned from different sources I am doubtful if the license fee is worth the trouble if the amount of a license will be raised by more than a few cents. Let us all as owners of cars, trucks, etc., make our wants known right now. Flood the parliament buildings with letters suggesting the license be raised to two dollars and the tax raised on fuel instead. If any have obtained their license so soon it should be quite easy to return them. What is the need of the change in price. But make our wants known right now. —Peters, Alta. C. R. C. C.

#### On This Date

By FRED WILLIAMS

Ninety years ago, when the experiment of reuniting Lower and Upper Canada into the Province of Canada was nearing the end of its first decade, the Hon. John A. Macdonald and Lord Elgin, the governor general, were both convinced that one of the most necessary things to do was to preserve the British colony of Quebec. In a letter written April 5, 1849, Lord Elgin to the Hon. John A. Macdonald, he said: "I am obliged to admit that the present state of public feeling in this colony renders it impossible."

Lord Elgin's policy was to try to keep the Tory agitation in Montreal and elsewhere for annexation to the United States. "Because he could not have all they want at once" was having, and pointed out that this agitation made it "difficult to increase the disposition of the public feeling in this colony either by direct understandings by the government or by private contacts."

Yet at the same time, Lord Elgin was so confident that the grant of responsible government to Canada would bring about the end of the Tory agitation. He asked Lord Elgin to advise him of any Canadian debtors, which he was ready to buy, pointing a financial transaction at home to do so. Grey did not share his faith in his deeds and never regretted his investment in Canada, being much more lucky than many of his countrymen who had a decade later poured their money into Canadian railways, with deplorable results to the investors.

Despite many negotiations and financial guarantees by Great Britain, the Tory agitation in Montreal, that construction of the "Bond of Iron" which will unite Halifax to Quebec and later to the west was begun and the Intercolonial railway was built from Quebec to Quebec until 1876. Nearly 30 years after Grey and Elgin had seen used for it.

Cora: Did that expensive travel cost your husband's baldness?

Dora: Yes, when the bill came he was able to tear out handfuls of hair.

"Father, don't men call themselves bald when they are bald?"

"What do they call themselves after, dad?"

"Hail! Your mother's blessing!"

## NEW METHOD FOR TREATING CANCER BARED

**Medic Develops Human Bone Marrow In Test Tube**

By STEPHEN J. McDONOUGH Associated Press Feature Writer  
NEW ORLEANS, La., April 5.—A new method of treating cancer of the blood with a precision never before possible is described recently before the American College of Physicians.

Dr. Edwin E. Ogden of the University of Oregon medical school, reported he had developed a process of growing human bone marrow in a test tube and treating it with x-rays of radium to determine exactly the dosage of radiation necessary to check growth of leukemic cells commonly known as blood cancer.

The white blood corpuscles are affected. Normally they are disease-fighting agents of the body which go to work quickly on invading infection by eating disease bacteria.

When they run out of control their population in the blood is multiplied hundreds of times and the effect of controlling infection they cause a new one.

By growing the white blood corpuscles in a test tube and subjecting them to varying amounts of radiation from x-rays and radium, it now appears possible the cancer can be treated with accuracy. It was reported before, Dr. Ogden declared.

In their experiments Dr. Ogden and his assistants, Dr. J. H. Bracher, identified the blood cells as they developed in bone marrow, and treated them with varying amounts of x-ray or radium radiation necessary to control their growth within normal limits.

## War Jitters Startle Rumanians

**Half Million Officers Arrested Bad Man By Clever Ruse**

By STEPHEN J. McDONOUGH Associated Press Feature Writer  
NEW ORLEANS, La., April 5.—The Rumanian soldiers above snapping through parade formations in dress uniform—and half a million others—now have changed to field clothes and are guarding the borders of this oil and wheat-rich Balkan kingdom against feared German and Hungarian military aggression.

**Installs Officer Arrests Bad Man By Clever Ruse**

By STEPHEN J. McDONOUGH Associated Press Feature Writer  
NEW ORLEANS, La., April 5.—Constable D. W. Patte of the Royal Canadian Mounted Police at Inuit, Alaska, Tuesday told of arresting an armed "bad man" last week who threatened "I'll shoot if you come a step nearer."

Patte told of how he began talking about the weather and anything that came to his mind until he noticed the man off guard. Then he plunged, knocked a rifle muzzle into the air and seized his quarry who allegedly threatened Edmonton district for several days.

The man, taken to Inuit, was later committed to the Ponoka mental institution. Police withheld his name.

**Fleeing Youth Shoots Taximan In Holdup Try**

By STEPHEN J. McDONOUGH Associated Press Feature Writer  
QUEBEC, April 5.—A young man by police to be fleeing from the scene of an attempted hold-up, shot and seriously wounded a taximan driver last night and then committed suicide.

Jean Paul Lapointe, 38, died from a self-inflicted bullet wound in the chest after shooting Alexandre Gosselin, 35-year-old taxi-driver, above the head. Hospital authorities said Gosselin was in critical condition.

Patte told of how he began talking about the weather and anything that came to his mind until he noticed the man off guard. Then he plunged, knocked a rifle muzzle into the air and seized his quarry who allegedly threatened Edmonton district for several days.

**Federal Aides Must Stick To Own Jobs**

By STEPHEN J. McDONOUGH Associated Press Feature Writer  
OTTAWA, April 5.—Full-time federal government employees receiving more than \$1,200 a year will not be permitted to engage in outside employment after May 1, except by special authority of the treasury board, under an order-in-council adopted last March 29, and made known today.

## Fellowship

**MACKENZIE KEITH** of Edmonton, who has been awarded a \$1500 scholarship by the Royal Society of Canada.

## FELLOWSHIP IS GIVEN STUDENT: STUDIED IN CITY

Mackenzie Lawrence Keith, 27, of Edmonton, and a graduate of the University of Alberta, was awarded a \$1500 fellowship by the Royal Society of Canada under endowment of the Carnegie Corporation, according to an announcement made Tuesday by Dr. Arthur Beauchamp, clerk of the house of commons and honorary secretary of the society. Seven other applicants received similar fellowships.

Mr. Keith, whose parents, Mr. and Mrs. J. P. Keith, reside at 1008 9th avenue, attended King Edward public school and Strathcona high school in Edmonton. He graduated from the University of Alberta in 1924 in geology and mining. Following a one year post graduate course at Kingston, he received a scholarship entitling him to two years at the Massachusetts Institute of Technology at Boston.

Mr. Keith plans to continue his studies under Dr. H. W. Fairbank at Massachusetts Institute of Technology. The fellowships are tenable for one year.

Francis E. T. Priestley, 48, of Toronto, and a graduate of the University of Toronto, was also awarded a fellowship. At present he is a Fellow in English at the University of Toronto. The award will enable him to go to the British Museum in London to prepare a book on "William Godwin's Political Justice."

## Moslems Mourn

The Arabian Moslem Society of Edmonton held a religious service in the Mohammedan Mosque, Tuesday night, mourning the death of the distinguished late King Ghazi of Iraq, who was the descendant of the Prophet Mohammed.

## ALBERTA MAY SEE REVENUE INSURANCE

Visitor Is Critical Of Province Going Into New Business

Fear that the provincial government "was going into the fire insurance business for the revenue it can get out of it" was expressed here Wednesday morning by H. C. Mills, of Toronto, general manager of the insurance company of North America.

Mr. Mills, who came to the city from Vancouver, left at noon for Calgary on his way back to Toronto.

"If the private insurance companies have done anything wrong, it is within the power of the provincial government to see that these abuses are corrected," he said.

"I take it that since no such defects in insurance practice have been discovered, that the object of the public interest continues to be the motivating factor in insurance companies," he said.

"I am not opposed to regulation of business by governments and in fact believe that a reasonable amount of such regulation is desirable. But a government actually goes into the insurance business, that is going too far. On the same principle, why is it not to go into the oil or gold or other business?" Mr. Mills asked.

The insurance executive said that he believed the economic development of Canada in accordance with provincial rights, and added that he wanted political leaders to recognize the "national vision."

**YOUNG POLITICIANS**  
Young men who go into public life if governments are to respond to public needs, Mr. Mills said, must be trained in the "professional politician."

Mr. Mills declared that one of the big reasons why Premier Bennett was elected premier of Ontario was that he stood for the spirit of youth as opposed to the practices of older men who had ruled for many years with political parties in power.

## Students Here Refuse To Eat Live Goldfish

"Swallow 50 goldfish? Live ones? Well, no!"

Such was the typical reaction of male students at the University of Alberta Wednesday when approached by a Bulletin reporter, who suggested that fame, if not fortune, awaited the one who would eat the live goldfish. The student of 60, now held by a student at an eastern American institution.

"No sir me. Those guys must be nuts," was the most enthusiastic reply that could be obtained, and was the almost unanimous answer, although one or two brave souls admitted there might be some merit in the scheme if someone were willing to bet them they couldn't, or would supply them with a suitable emulsifying fluid for the little wretches.

Those timers around Alberta's lake leaders recalled that a freshman once ate a 12-inch live goldfish at a dining hall. But he did it for \$2, cash right on the table. But that's a matter he isn't having anything to do with either goldfish or one o'clock—usually just the same.

Only sign of adolescent exuberance around the Varsity right now is heard being given by the second-year engineers, third students. These worriers of many things, can be easily spotted as they tramp from study room to examination hall by the growl of their rumbling stomachs.

These real whippers—which are their rugged features—these jaws haven't been allowed since they started studying for exams and won't want them any more. "But it isn't a show off board. It is just common sense. You can't eat a live goldfish," explained one of the bearded ones.

## Home Is Burgled

Returning home after a three-hour absence Tuesday night, Mr. R. Blackwood, of 1011 13th street, found his burglar or burglars had ransacked the residence, leaving a trail of burned matches. Nothing was reported missing.

## Chairman

## CAUCUS TALKS SUPPORT FOR SECRET M.P.'S

M.L.A.'s Will Assist Federal Candidates During Campaign

Participation of Social Credit members of the legislature and the association they would be prepared to lend their comrades running for parliament, was scheduled for discussion at the Wednesday sitting of the caucus now in session at the legislative building.

With a Dominion election in view this year, the members of the legislature have expressed opinions that their Social Credit comrades running for parliament would be able to carry the burden of creating and organizing campaigns without some assistance. It was the form and extent of this aid that was set down for discussion on Wednesday.

**NOT PROVINCIAL**  
Members of the caucus were careful to point out that the discussion was entirely on the Dominion election and they denied there was any thought of a provincial election in the future. In support of this point of view, several statements already made by Premier William Abernethy that there was no provincial election this year.

Inside political circles are of the opinion that only some minor crisis would bring on a provincial general election in the near future. The government forces have made no move toward an election this year and observers say that signs are all to the contrary.

**HAYES' FUNDRAISER**  
The caucus will fundraise in order to allow members to attend the funeral of W. E. Hayes, Social Credit member of the house for St. John's.

The Tuesday afternoon sitting of the gathering was devoted to discussion of departmental matters and other matters, which further information was desired by members.

**The Inquiring Reporter**  
Prevalence of jay-walking on Edmonton streets, especially at low-down intersections where people step off the curb, between parked cars and into the path of traffic lights prompted The Bulletin's Inquiring Reporter to seek opinions on the jay-walker as a traffic hazard. Here are the results.

**ALD. J. H. OULIVIE:** The jay-walker takes the most unreasonable chances and unfortunately when he is run down, nine times out of ten, public opinion is against him. He is a nuisance and unfortunate enough to be involved in the accident.

**NOT-MAL, ALEX MIDDLE:** Chief of city traffic police. The jay-walker, found everywhere, is a danger to himself and to others. He not only takes his own life in his hands every time he indulges in this rash practice, but he is also driving a nightmare for motorists.

**ALFRED FARMLO, secretary, Trades and Labor Council:** There is little to be said for the jay-walker. He violates one of the most fundamental laws of the city. He is a danger to himself and to others. He is a nuisance and unfortunate enough to be involved in the accident.

**HARRY JONES, clerk:** The jay-walker shows no consideration for the motorist, who has every right to expect that traffic between intersections will be uncomplicated by the unexpected appearance of pedestrians.

**LEAVING SHORTLY ON A VISIT TO THE UNITED STATES:** Dr. Herbert Rose, staff member of the provincial health department, will attend the bi-weekly Dominion Council in held at Oklahoma City, as well as the New York World Fair.

**Registered unemployed in this province on Saturday last totaled 1,897, according to figures released on Wednesday by Alberta Employment Service officials. This is an increase over the previous week, when the total was 1,737. Of the total registered, there were 708 men and 889 women.**

**Survivors of the North Saskatchewan river east of the city, to disclose what work and costs would be involved in the project have been established there. The action is based on the allegations that Mr. White is not legally entitled to vote, but was permitted to do so, that three votes were cast in his name, and that right and six votes cast in favor of Mr. Korchinski were rejected as illegal ballots by the returning officer.**

## I Saw Today

partaking of some light refreshment at his favorite main eat restaurant.

**AND**  
Baker Peckie in conversation with a friend at Jasper and 101 street: Len Vance losing no time in wending his way east along the main drag, "Red" Beattie and Syd. Hamilton recalling old days here and there as they strolled along the same thoroughfare, Gilbert Murray on 108 street talking over reports of Tuesday's hockey game at Winnipeg; Billy Beattie rounding the Bank of Nova Scotia building corner; "Doc" Charbel's exchanging greetings with a friend in the central section of the city; Ted Walbridge heading toward the centre of the city from the west end; E. A. G. Smart, doing likewise; Sterling Russell entering the legislative building.

**NEW BUILDING FOR RED DEER EATON'S PLAN**  
Merchandising Firm Will Build Handsome Store In Central Town

The T. Eaton Company Western Limited will begin construction of a handsome new store in Red Deer in the immediate future, it was announced here Wednesday by the company.

Information received describes the store for a store that combines a modern modern shopping center. It will be erected on the site of the present store, and will occupy 150 feet frontage on Galt Avenue, by 100 feet.

The two-story building will be of steel construction throughout and will be finished in light grey face brick, trimmed with Rydall stone.

The store will be designed by the Edmonton architect, is the latest streamlined type. Its ornamentation is accentuated by horizontal banding throughout while modernity of line and decoration is the theme of the whole treatment.

A striking feature of the store will be the absence of windows with stainless steel frames in a setting of glass. The store will be a parking place for cars.

Every detail of the building will provide added convenience for those who stop to look at the window display.

Inside all appointments will be carefully chosen for the comfort of the shopper. Every detail of construction and finish has been planned for the customer's utmost convenience.

Parking space will be provided for the customer's convenience. The company has acquired considerable property, adjacent to the store site, to be used as a parking lot.

**New Bursaries Are Announced By Research Council**  
Supplementing the list of special scholarships, fellowships and studentships recently announced by the Research Council, the council announces the awarding of 28 bursaries of the value of \$250 each.

The bursaries are to enable recent graduates in engineering, physics, chemistry, biology, and other sciences to proceed in the several university laboratories with the initial stages of their postgraduate training in research.

Among those to whom bursaries have been awarded is J. S. McEwen, graduate of the University of Alberta, who will study physics at McGill University.

**City Players To Leave Friday For Drana Festival**  
Le Cercle Mulaire of Edmonton, runner-up in the Alberta regional play festival held in February, will leave Friday for London, Ont., to participate in the Dominion Drama Festival.

The group from Edmonton will join the Olive players, winners of the Alberta Festival, and the National players, B. C. winners, at Calgary.

Those making the trip from Edmonton are: Paul Herveux, Gabriel Herveux, Alphonse Herveux, Marie A. Herveux, Fannie Blouin, Gerard St. Germain, Pauline Blouin, director, and Romeo Boudreau, assistant director.

## \$10,000 COST ROYALTY VISIT IS CITY SHARE

City council at a special meeting on Tuesday gave tentative authorization for expenditure of \$10,000 as the city's share of out-of-pocket expenses of the Royal Visit to Edmonton on June 2, when current estimates were under review.

This was the first direct statement of anticipated costs of the visit. The major cost, although this amount previously was reported unofficially, along with a report of the previous week, was \$10,000 of the cost.

Council also approved net estimated expenditure of \$53,430 for the public library board, gross expenditure to be \$58,430 and estimated revenue \$5,000. In 1928 the revenue was \$1,000 and the net expenditure \$57,430.

Cost of operation of the civic employment bureau at a budget figure of \$2,500 was approved.

**Free Bleacher Space During Royal Visit**  
The city will be provided with bleachers for free seats, will be able to get free bleacher space for the purpose of a "bleacher son," so well known in the city.

Some fifty thousand vouchers are being prepared, Mr. Abbott said.

**CRASH VICTIM'S BODY BEING SENT PARENT'S HOME**  
Remains of Ward Hall, 17-year-old Scamman youth who was killed in an auto accident early Sunday morning last night, will be forwarded to Smith Thursday by Hainstock.

## North Highway Ban Lifted Wednesday As Roads Improve

Ban on the Edmonton-South Highway and roads north of Smith was lifted by the provincial public safety department at 9 a.m. Wednesday.

All other bans have been lifted with the exception of the highway from Lethbridge to Pelly Springs and from Macleod to Waterton in the south and from Wildwood west to Inglewood in the north.

Increasing moisture in some sections may necessitate placing of other bans, it was stated.

There are three classes of mineral wool: rock wool, slag wool and glass wool.

**Appropriation Listed Under Miscellaneous Expenditures**  
City council at a special meeting on Tuesday gave tentative authorization for expenditure of \$10,000 as the city's share of out-of-pocket expenses of the Royal Visit to Edmonton on June 2, when current estimates were under review.

This was the first direct statement of anticipated costs of the visit. The major cost, although this amount previously was reported unofficially, along with a report of the previous week, was \$10,000 of the cost.

## DARDANELLES WILL BE OPEN IF WAR COMES

### France Gives Assurance By Turkey Which Controls Sea Entrance

PARIS, April 3.—France was reported in international quarters today to have assured Romania that in event of European war the Dardanelles would be open to French and British warships.

During building of the southern part of the "Hot River" bridge, France was said to have received assurance from Turkey, which controls the entrance to the Black Sea and Romania's "back door," of support for the French-British troops to prevent the independence of small European countries.

### ANEX SANJAK

In exchange, these sources said, Turkey was told she could eventually annex the Sanjak of Alexandretta although situated in Syria and that impossible for the principle. The Sanjak is a small district of northern Syria.

Turkey was represented as being willing to wait until the government of President Llorenç, already named under the French-British because of its own fear of Germany's expansion, was established.

### NO FORCEFUL SEIZURE

These developments followed assurance yesterday by the Turkish ambassador that Turkey would not seize the Sanjak by force after Paris newspapers reported 60,000 Turkish troops on the way to occupy the territory.

Turkey, however, informed France she wished to enter the 600-square-mile district "as quickly as possible."

But Turkey could afford to wait as the district with its valuable harbor in the eastern Mediterranean already is entirely in the hands of the Turkish minority there and has added Turkish money and standards.

### NEED NOT FEAR

On other fronts in her "Hot River" maneuvers, France sought to assure Romania she need not fear cooperation with Russia and that the "anti-aggression" bloc could not be sold even by the Dardanelles, unless Bucharest was ready to co-operate fully with Russia as ally.

Rumania, however, remained distrustful of Moscow's designs on Rumania's 17,000 square mile design.

## Proud New Conqueror Of Atlantic

### FLOOD VICTIMS' FUNERAL HELD AFTER INQUEST

DAWSON CREEK, B.C., April 3.—Funeral services for Mrs. Mabel Warren and Donald Lamont, victims of the flood which overwhelmed the little village of Eastview several days ago, were buried here Tuesday afternoon.

At the inquest held Monday, jurymen decided that they died as a result of the suffering of water and ice they received when they were swept away by the flood which destroyed their homes, and carried six children to watery death.

Jury consisted of J. Porter, foreman; Stan Wade, Jack Patterson, H. Calverley, William Collins, K. Aspel.

### 600 On Strike

CREEKE, England, April 3.—More than 600 workers in the Rolls-Royce airplane motor factory here went on strike today in protest against the employment of women in some of the plant's shops.

### Japanese Airline

TOKYO, April 3.—Japan today launched its long-planned airline to the South Sea when the transport ship Sagami left for the island of the Marianne group almost within sight of Guam.

Since when Russia took the opportunity to annex in 1918. They were reported to be ready to accept Soviet arms, munitions and planes in event of an attack by Germany but not to accept Russian troops on their soil even to resist Germany.

## U.S. Government Opens Drive to Eliminate Sweepstake Ticket Sales

LOS ANGELES, April 3.—The government has opened a drive to abolish the sale of Irish sweepstake tickets.

As his first step in the drive, Harrison subpoenaed before a federal grand jury 72 Irish holders who won prizes in the March sweepstake of \$500 to \$1,000 each. They will be asked upon appearance next Wednesday the identity of persons whom they purchased the tickets.

Government attorneys working with Harrison in the drive expected all 72 to be co-operative "or else find things very difficult." They pointed out that possession of a ticket was a felony punishable by \$1,000 fine and two years in prison.

Harrison said the drive was begun here because he believed Los Angeles was the major distribution center for the tickets. Southern Californians spend between \$50,000 and \$100,000 annually on the tickets conducted in Ireland.

Tickets both here and on the Alameda were said, were being imported in bulk lots. His immediate plan was to attempt to trace their distribution to the big operators by questioning "small fry" sellers.

### CHICAGO VOTES FOR DEMOCRAT MAYOR KELLY

CHICAGO, April 3.—Mayor Edward J. Kelly, leader of the city's powerful Democratic organization, was elected today by the city's voters.

Democracy predicted a victory for Kelly, under the name of the city's voters.

### Revision Of U.S. Neutrality Act Is Urged By Pittman

WASHINGTON, April 3.—Senator Key Pittman (Dem., Nev.) urged today that the United States neutrality act be revised quickly.

The Senate Foreign Relations committee, which Pittman heads, called Henry Stimson, secretary of state, under President Hoover, to the first witness at hearings on several proposed bills to revise the act.

Stimson is an advocate of collective action by nations in an attempt to secure world peace.
